Comment:	<p>it would be novel for the nih and cdc agencies, all of them would open up their meetings to be open and transparent and to let the public in to view what they are up to since it all is so corrupt and damaging to the american economy and to american healthy. it turns out that so very little that the cdc propagandizes is in fact factual and has any documentation but it seems to instead to be platitudes thought up to tell the us public to be cowards in their basements and scare them to hell. this agency has lost much respect from the us public and we really cant trust anything you write or say because it is either hidden and you dont want to give it up for 76 yers or it is fake and made up entirely. there have been at least 10 foia requests followed up by court filings wher it turns out this agency had absolutelhy no documents, no studies no nothing to back up what they write and says. that shows a very evil propagandist at work looking for money from rich corporations and to rape the us. bpucli the ethics and morals of this entire cdc nih are entirely compromised. we need new agencies and new staff. the ones who are there are part of this evil conspiracy. to lie to the us public. this cmometn is for the public record please receipt.</p>
